xкMasternode
GEN2

Introduction

The XK Series devices are high-performance blockchain devices that empower users to seamlessly participate in digital network activities and earn rewards. With their compact designs and intuitive user interfaces, the XK Series provides a powerful gateway into the expanding world of digital assets.

XK Masternode: Optimized for Blockchain

The **XK Masternode** is a compact, durable computing device tailored for blockchain enthusiasts. Housed in a robust aluminum case, it offers dual-band 2.4Ghz / 5Ghz connectivity for fast network access. Powered by an advanced ARM processor, this device efficiently manages masternodes and supports various blockchain protocols.
It operates on an external 12V adapter, making it ideal for decentralized network operations.

Main Features	
Proportions	20 x 15 x 10 cm
Finishing	Black Aluminum Case
Connectivity	2.4Ghz / 5Ghz
Ports	1 WAN Port, 1 LAN Port
Power	110-220V
Processor	Intel® Core™ i7 Processor
