

# XK5000

## GEN2

## Introduction

The XK Series devices are high-performance blockchain devices that empower users to seamlessly participate in digital network activities and earn rewards. With their compact designs and intuitive user interfaces, the XK Series provides a powerful gateway into the expanding world of digital assets.

## XK 5000: High-Performance and Versatile

Built for more robust blockchain operations, the **XK 5000** offers increased durability with its 16 x 14 x 8 cm aluminum case. It is powered by an Intel® Core™ i5 processor, allowing for higher processing power.

It operates with 110-220V and includes standard 2.4Ghz / 5Ghz connectivity alongside WAN and LAN ports for versatile network connections.

### Main Features

Proportions	16 x 14 x 8 cm
Finishing	Aluminum Case
Connectivity	2.4Ghz / 5Ghz
Ports	1 WAN Port, 1 LAN Port
Power	110-220V
Processor	Intel® Core™ i5 Processor
