

Admission Dataset Specification

The "Admission Dataset Specification" contains member admissions identified based on the claim data. The admission data is based on the medical claims analysis, as there is a real time Admission entity which is based on the ADT messages analysis. It does not have a unique key. It references Members by Member_ID and Providers by Provider_ID. It also references included Medical_Claims. It references to and from an Episode in which Admission was included.

- [Admission](#)
- [Admission Diagnosis Codes](#)
- [Admission Medical Claims](#)
- [Admission Procedure Codes](#)
- [Admission Log](#)
- [Admission Raw](#)

Key highlights include:

- Comprehensive Admission Insights:** This specification leaves no stone unturned, capturing every aspect of the patient admission process. It ensures a complete profile is available for healthcare management, providing a sense of reassurance in its thoroughness.
- Integrated Health Records:** This specification consolidates medical histories, diagnostic outcomes, and treatment records to coordinate patient care.
- Financial and Clinical Data Fusion:** This process merges billing details with clinical data, providing a unified view supporting healthcare delivery and administrative activities.
- Operational Efficiency:** This specification harnesses detailed logs of medical procedures and actions to optimize workflow and resource allocation, leading to streamlined operations and improved patient care.
- Holistic Patient Management:** This approach aims to improve the quality of care by gaining a well-rounded understanding of the patient journey, from initial admission to discharge and follow-up.

This dataset goes beyond simple data collection by transforming raw health information into practical insights. It aims to enhance treatment outcomes and increase operational efficiency, offering valuable support to healthcare providers.

Admission

Column Name	Is Nullable	Data Type	Description
Member_ID	YES	STRING	Unique identifier of the member admitted to the hospital.

Column Name	Is Nullable	Data Type	Description
Admit_Date	YES	DATE	Date when the member was admitted to the hospital.
Admission_ID	YES	STRING	Unique identifier for the admission record. The admission data is fully refreshed at each analytics execution. Admission_ID is assigned in the scope of analytics execution and cannot be used as a clue between two analytics executions because it can be reused.
Admit_Source	YES	INT64	Source from which the member was admitted to the hospital. With enum present: - When Admit_Type_Code is set to Newborn: 1 (Normal delivery) 2 (Premature delivery) 3 (Sick baby) 4 (Extramural birth (and Newborns)) 9 (Information not available) - When admissions are other than Newborn: 1 (Physician referral) 2 (Clinic referral) 3 (HMO referral) 4 (Transfer from a hospital) 5 (Transfer from a skilled nursing facility) 6 (Transfer from another health care facility) 7 (Emergency Room) 8 (Court/Law enforcement) 9 (Information not available)
Discharge_Date	YES	DATE	Date when the member was discharged from the hospital.
Length_Of_Stay	YES	INT64	Duration of the member's stay in the hospital.
Hospital_ID	YES	STRING	Unique identifier of the hospital where the admission took place.
Exclusion	YES	BOOL	Indicator for exclusion status, possibly related to specific conditions or criteria.
Record_Type	YES	STRING	Record type calculated based on std_place. Inpatient vs Outpatient.

Column Name	Is Nullable	Data Type	Description
Diagnosis_Scheme_Code	YES	STRING	The ICD procedure or diagnosis coding system: ICD10 vs ICD9
Primary_Disease_Category	YES	STRING	Category of the primary disease or condition for the admission.
Primary_Disease_Stage	YES	FLOAT64	Stage or severity level of the primary disease or condition.
Diagnosis_Related_Group	YES	STRING	The diagnosis-related group code from the last room and board record. This is a pass-through field.
Calculated_Diagnosis_Related_Group	YES	STRING	Calculated diagnosis-related group based on various factors.
Allowed_Amount	YES	FLOAT64	The total allowed amount for the admission. This field is the sum of the allowed amount on all claims grouped into the admission
Submitted_Amount	YES	FLOAT64	The total submitted or billed charge amount for the admission. This field is the sum of the submitted charge amounts of all claims grouped into an admission.
Net_Amount	YES	FLOAT64	The total net payment for the admission. This field is the sum of the net payment of all claims grouped into the admission.
Total_RVU_Amount	YES	FLOAT64	The total relative value units the admission. This field is the sum of the rvu amounts of all claims grouped into the admission.
Admission_MDC_Code	YES	STRING	Admission MDC code, based on all claims present in the admission, can be different than mdc_cd.
Days_Since_Previous_Admission	YES	INT64	Number of days since the member's previous admission.
Days_Until_Next_admission	YES	INT64	Number of days until the member's next admission.
Cost_Comparison	YES	INT64	Identifies how admissions compare to the MarketScan average based on Allowed Amount Total Admit for the DRG, that is, whether the admission costs significantly more or less than average for admissions in that DRG. Values: -3, -2, -1, 0, 1, 2, 3, where -3 indicates extreme outliers below the average, 3 indicates extreme outliers above the average, and 0 indicates the admission is not an outlier. The field will be blank if the DRG is not found or if all the MarketScan benchmark amounts for the DRG are 0.
Length_Of_Stay_Comparison	YES	INT64	Identifies how admissions compare to the MarketScan average based on Length of Stay (LOS) for the DRG, that is, whether the admission was significantly longer or shorter than average for admissions in that DRG. Values: -3, -2, -1, 0, 1, 2, 3, where -3 indicates extreme outliers below the average, 3 indicates extreme outliers above the average, and 0 indicates the admission is not an outlier. The field will be blank if the DRG is not found or if all the MarketScan benchmark amounts for the DRG are 0.

Column Name	Is Nullable	Data Type	Description
Per_Diem_Comparison	YES	INT64	Identifies how admissions compare to the MarketScan average based on Total Allowed Amount per day for the DRG, that is, whether the admission was significantly longer or shorter than average for admissions in that DRG. Values: -3, -2, -1, 0, 1, 2, 3, where -3 indicates extreme outliers below the average, 3 indicates extreme outliers above the average, and 0 indicates the admission is not an outlier. The field will be blank if the DRG is not found or if all the MarketScan benchmark amounts for the DRG are 0.
Standard_Provider_Type	YES	INT64	Standardized type of the provider involved in the admission. Mapped from Provider specialty.
Admit_Type_Code	YES	INT64	Type of admission. 1 (Surgical) 2 (Medical) 3 (Maternity/Newborn) 4 (Psychiatric/Substance Abuse) 5 (~Missing/Unknown)
Standard_Facility_ID	YES	STRING	Facility ID Standard value derived from Provider's National Provider ID.
Episode_ID	YES	STRING	Reference to the medical episode which includes the admission.
Admit_Source_Description	YES	STRING	Description or details of the admission source.
Admit_Source_Category	YES	STRING	Admission source: NEWBORN vs NON-NEWBORN.
Diagnosis_Related_Group_Description	YES	STRING	Description or details of the diagnosis-related group for the admission.
Calculated_Diagnosis_Related_Group_Description	YES	STRING	Description or details of the calculated diagnosis-related group for the admission.
Admit_Type_Description	YES	STRING	Description or details of the admission type.
Patient_Status_Code	YES	STRING	UB-92 patient status code. Also known as discharge disposition code.
Patient_Status_Description	YES	STRING	Description or details of the patient's status during the admission.
Primary_Disease_Category_Description	YES	STRING	Description or details of the primary disease or condition category for the admission.
Visibility_Level	YES	INT64	Level of visibility or access permissions for the admission record.
Behavioral_Health_Admission_Indicator	YES	BOOL	Indicator for behavioral health admission related to the admission.

Admission Diagnosis Codes

Column Name	Is Nullable	Data Type	Description
Member_ID	YES	STRING	Unique identifier of the member related to the admission.
Admission_ID	YES	STRING	Unique identifier for the admission record.
Episode_ID	YES	STRING	Identifier for the episode of care associated with the admission.
Diagnosis_Codes_Code	YES	STRING	Code representing the diagnosis associated with the admission (ICD-9 or ICD-10).
Diagnosis_Codes_Description	YES	STRING	Description of the diagnosis code for the admission.

Admission Medical Claims

Column Name	Is Nullable	Data Type	Description
Member_ID	YES	STRING	Unique identifier of the member associated with the admission.
Admission_ID	YES	STRING	Unique identifier for the admission record.
Episode_ID	YES	STRING	Identifier for the episode of care associated with the admission.
Medical_Claims_Claim_Number	YES	STRING	The unique, alphanumeric identifier for each claim submitted with the input data.
Medical_Claims_Claim_Type	YES	STRING	Type or category of the medical claim.
Medical_Claims_Claim_Line_Number	YES	INT64	Line number associated with the medical claim within the admission.

Admission Procedure Codes

Column Name	Is Nullable	Data Type	Description
Member_ID	YES	STRING	Unique identifier of the member associated with the admission.
Admission_ID	YES	STRING	Unique identifier for the admission record.
Episode_ID	YES	STRING	Identifier for the episode of care associated with the admission.
Procedure_Codes_Code	YES	STRING	Code associated with the procedure performed during the admission.
Procedure_Codes_Description	YES	STRING	Description of the procedure performed during the admission.
Procedure_Codes_Scheme_Code	YES	STRING	Procedure Code Scheme Code (CPT4/HCPCS/ICD-10).

Admission Log

Column Name	Is Nullable	Data Type	Description
Member_ID	YES	STRING	Unique identifier of the member related to the admission.
Admit_Date	YES	DATE	Date when the admission occurred.
Admission_ID	YES	STRING	Unique identifier for the admission record. The LOG table contains records from all previous executions, however Admission_ID can be reused for completely different admission and analytics executions are completely independent. It is a key difference from other entity logs.
Admit_Source	YES	INT64	Source or reason for the admission.
Discharge_Date	YES	DATE	Date when the patient was discharged.
Length_Of_Stay	YES	INT64	Duration of the admission stay.
Hospital_ID	YES	STRING	Identifier of the hospital where the admission took place.
Exclusion	YES	BOOL	Indicator for any exclusion or special circumstance related to the admission.
Record_Type	YES	STRING	Record type calculated based on std_place. Inpatient vs Outpatient.
Diagnosis_Scheme_Code	YES	STRING	The ICD procedure or diagnosis coding system: ICD10 vs ICD9
Medical_Claims	NO	ARRAY	Details related to medical claims associated with the admission. For more information on parameters in this Array, see the Medical Claim table in the Medical Claim dataset.
Medical_Claims.Claim_Type		STRING	Type of claim, categorizing the nature of the medical claim.
Medical_Claims.Claim_Number		STRING	Unique identifier for the claim, used to track individual claims.
Medical_Claims.Claim_Line_Number		INT64	Line number within the claim, representing specific items or services.
Diagnosis_Codes	NO	ARRAY	Diagnosis codes associated with the admission. For more information on parameters in this Array, see the Medical Claim Diagnoses table in the Medical Claim dataset.
Diagnosis_Codes.Code		STRING	The unique identifier or code assigned to the diagnosis, as per standardized medical coding systems.
Diagnosis_Codes.Description		STRING	Detailed description of the diagnosis associated with the code, providing clinical details.

Column Name	Is Nullable	Data Type	Description
Procedure_Codes	NO	ARRAY	Procedure codes associated with the admission. For more information on parameters in this Array, see the Medical Claim Procedures table in the Medical Claim dataset.
Procedure_Codes.Code		STRING	The unique identifier or code for the medical procedure, used in healthcare documentation.
Procedure_Codes.Description		STRING	Detailed explanation of the medical procedure associated with the code.
Procedure_Codes.Scheme_Code		STRING	Code identifying the coding scheme used (e.g., ICD-10-PCS, HCPCS), which organizes procedure codes.
Procedure_Codes.Set_Code		STRING	Code identifying the specific set or category within the coding scheme that the procedure belongs to.
Procedure_Codes.Set_Code_Description		STRING	Description of the set or category to which the procedure code belongs, explaining its context or grouping within the scheme.
Procedure_Codes.Set_Type_Code		STRING	Code that further categorizes the procedure within its set for more specific classification.
Procedure_Codes.Set_Type_Code_Description		STRING	Description of the set type, providing details on the nature and context of the procedure categorization.
Primary_Disease_Category	YES	STRING	Category of the primary disease related to the admission.
Primary_Disease_Stage	YES	FLOAT64	Stage or severity of the primary disease.
Diagnosis_Related_Group	YES	STRING	The diagnosis-related group code from the last room and board record. This is a pass-through field.
Calculated_Diagnosis_Related_Group	YES	STRING	Calculated diagnosis-related group for the admission.
Allowed_Amount	YES	FLOAT64	The total allowed amount for the admission. This field is the sum of the allowed amount on all claims grouped into the admission
Submitted_Amount	YES	FLOAT64	The total submitted or billed charge amount for the admission. This field is the sum of the submitted charge amounts of all claims grouped into an admission.
Net_Amount	YES	FLOAT64	The total net payment for the admission. This field is the sum of the net payment of all claims grouped into the admission.
Total_RVU_Amount	YES	FLOAT64	The total relative value units the admission. This field is the sum of the rvu amounts of all claims grouped into the admission.
Admission_MDC_Code	YES	STRING	Admission MDC code, based on all claims present in the admission, can be different than mdc_cd.
Days_Since_Previous_Admission	YES	INT64	Number of days since the previous admission.

Column Name	Is Nullable	Data Type	Description
Days_Until_Next_admission	YES	INT64	Number of days until the next admission.
Cost_Comparison	YES	INT64	Identifies how admissions compare to the MarketScan average based on Allowed Amount Total Admit for the DRG, that is, whether the admission costs significantly more or less than average for admissions in that DRG. Values: -3, -2, -1, 0, 1, 2, 3, where -3 indicates extreme outliers below the average, 3 indicates extreme outliers above the average, and 0 indicates the admission is not an outlier. The field will be blank if the DRG is not found or if all the MarketScan benchmark amounts for the DRG are 0.
Length_Of_Stay_Comparison	YES	INT64	Identifies how admissions compare to the MarketScan average based on Length of Stay (LOS) for the DRG, that is, whether the admission was significantly longer or shorter than average for admissions in that DRG. Values: -3, -2, -1, 0, 1, 2, 3, where -3 indicates extreme outliers below the average, 3 indicates extreme outliers above the average, and 0 indicates the admission is not an outlier. The field will be blank if the DRG is not found or if all the MarketScan benchmark amounts for the DRG are 0.
Per_Diem_Comparison	YES	INT64	Identifies how admissions compare to the MarketScan average based on Total Allowed Amount per day for the DRG, that is, whether the admission was significantly longer or shorter than average for admissions in that DRG. Values: -3, -2, -1, 0, 1, 2, 3, where -3 indicates extreme outliers below the average, 3 indicates extreme outliers above the average, and 0 indicates the admission is not an outlier. The field will be blank if the DRG is not found or if all the MarketScan benchmark amounts for the DRG are 0.
Standard_Provider_Type	YES	INT64	Standard type of provider associated with the admission.
Admit_Type_Code	YES	INT64	Type of admission. 1 (Surgical) 2 (Medical) 3 (Maternity/Newborn) 4 (Psychiatric/Substance Abuse) 5 (~Missing/Unknown)
Standard_Facility_ID	YES	STRING	Facility ID Standard value from the first room and board claim in the admission.
Episode_ID	YES	STRING	Identifier for the episode of care associated with the admission.
Type	YES	STRING	Type of record or data related to the admission.
Tenant	YES	STRING	Tenant information or identifier.
Active_Version	YES	BOOL	Active version or status of the admission record.
Date	YES	DATE	Date associated with the admission record.
Sequence	YES	INT64	Sequence or order of the admission record.

Column Name	Is Nullable	Data Type	Description
Source_System_Name	YES	STRING	Name of the source system from which the admission data originates.
Source_Timestamp	YES	TIMESTAMP	Timestamp indicating when the admission data was sourced.
Source_File_Name	YES	STRING	Name of the source file containing admission data.
Schema_Version	YES	FLOAT64	Version of the schema or data model used for admission data.
Admit_Source_Description	YES	STRING	Description or details of the admission source.
Admit_Source_Category	YES	STRING	Admission source: NEWBORN vs NON-NEWBORN.
Diagnosis_Related_Group_Description	YES	STRING	Description or details of the diagnosis-related group for the admission.
Calculated_Diagnosis_Related_Group_Description	YES	STRING	Description or details of the calculated diagnosis-related group for the admission.
Admit_Type_Description	YES	STRING	Description or details of the admission type.
Patient_Status_Code	YES	STRING	UB-92 patient status code. Also known as discharge disposition code.
Patient_Status_Description	YES	STRING	Description or details of the patient status related to the admission.
Primary_Disease_Category_Description	YES	STRING	Description or details of the primary disease category for the admission.
Visibility_Level	YES	INT64	Level of visibility or access permissions for the admission record.
Behavioral_Health_Admission_Indicator	YES	BOOL	Indicator for behavioral health admission related to the admission.
Member_Partition	YES	INT64	Partition or segment of data related to the member.
_updated	YES	STRING	Indicator for whether the admission record has been updated.
Action	YES	STRING	Action or operation performed on the admission record.

Admission Raw

Column Name	Is Nullable	Data Type	Description
Member_ID	YES	STRING	Unique identifier of the member associated with the admission record.

Column Name	Is Nullable	Data Type	Description
Admit_Date	YES	DATE	Date when the admission took place.
Admission_ID	YES	STRING	Unique identifier for the admission record.
Admit_Source	YES	INT64	Source from which the admission originated.
Discharge_Date	YES	DATE	Date when the patient was discharged.
Length_Of_Stay	YES	INT64	Duration of the admission in terms of days.
Hospital_ID	YES	STRING	Unique identifier of the hospital where the admission occurred.
Exclusion	YES	BOOL	Indicator specifying if the admission is excluded from certain analyses or calculations.
Record_Type	YES	STRING	Record type calculated based on std_place. Inpatient vs Outpatient.
Diagnosis_Scheme_Code	YES	STRING	The ICD procedure or diagnosis coding system: ICD10 vs ICD9.
Medical_Claims	NO	ARRAY	Details of medical claims associated with the admission. For more information on parameters in this Array, see the Medical Claim table in the Medical Claim dataset.
Medical_Claims.Claim_Type		STRING	Describes the type of claim, categorizing the nature of the medical claim. This can refer to types such as inpatient, outpatient, pharmacy, and so forth.
Medical_Claims.Claim_Number		STRING	A unique identifier for the claim, used to track and manage individual claims within the healthcare system.
Medical_Claims.Claim_Line_Number		INT64	Represents a specific item or service line within a claim, used for detailed tracking and accounting of each charge in a claim.
Diagnosis_Codes	NO	ARRAY	Codes indicating the diagnoses associated with the admission. For more information on parameters in this Array, see the Medical Claim Diagnosis table in the Medical Claim dataset.
Diagnosis_Codes.Code		STRING	The unique identifier or code assigned to the diagnosis, following standardized medical coding systems such as ICD-10.
Diagnosis_Codes.Description		STRING	Provides a detailed description of the diagnosis associated with the code, helping healthcare providers and billing staff understand the medical condition being addressed.

Column Name	Is Nullable	Data Type	Description
Procedure_Codes	NO	ARRAY	Codes indicating the procedures performed during the admission. For more information on parameters in this Array, see the Medical Claim Claim Line, Medical Claim Procedures tables in the Medical Claim dataset.
Procedure_Codes.Code		STRING	The unique identifier or code for the medical procedure, used in healthcare documentation.
Procedure_Codes.Description		STRING	Detailed explanation of the medical procedure associated with the code.
Procedure_Codes.Scheme_Code		STRING	Code identifying the coding scheme used (e.g., ICD-10-PCS, HCPCS), which organizes procedure codes.
Procedure_Codes.Set_Code		STRING	Code identifying the specific set or category within the coding scheme that the procedure belongs to.
Procedure_Codes.Set_Code_Description		STRING	Description of the set or category to which the procedure code belongs, explaining its context or grouping within the scheme.
Procedure_Codes.Set_Type_Code		STRING	Code that further categorizes the procedure within its set for more specific classification.
Procedure_Codes.Set_Type_Code_Description		STRING	Description of the set type, providing details on the nature and context of the procedure categorization.
Primary_Disease_Category	YES	STRING	Category of the primary disease or condition associated with the admission.
Primary_Disease_Stage	YES	FLOAT64	Stage of the primary disease or condition associated with the admission.
Diagnosis_Related_Group	YES	STRING	The diagnosis-related group code from the last room and board record. This is a pass-through field.
Calculated_Diagnosis_Related_Group	YES	STRING	Calculated grouping code for diagnoses related to the admission.
Allowed_Amount	YES	FLOAT64	The total allowed amount for the admission. This field is the sum of the allowed amount on all claims grouped into the admission
Submitted_Amount	YES	FLOAT64	The total submitted or billed charge amount for the admission. This field is the sum of the submitted charge amounts of all claims grouped into an admission.
Net_Amount	YES	FLOAT64	The total net payment for the admission. This field is the sum of the net payment of all claims grouped into the admission.
Total_RVU_Amount	YES	FLOAT64	The total relative value units the admission. This field is the sum of the rvu amounts of all claims grouped into the admission.
Admission_MDC_Code	YES	STRING	Admission MDC code, based on all claims present in the admission, can be different than mdc_cd.
Days_Since_Previous_Admission	YES	INT64	Number of days since the previous admission for the same member.

Column Name	Is Nullable	Data Type	Description
Days_Until_Next_admission	YES	INT64	Number of days until the next admission for the same member.
Cost_Comparison	YES	INT64	Identifies how admissions compare to the MarketScan average based on Allowed Amount Total Admit for the DRG, that is, whether the admission costs significantly more or less than average for admissions in that DRG. Values: -3, -2, -1, 0, 1, 2, 3, where -3 indicates extreme outliers below the average, 3 indicates extreme outliers above the average, and 0 indicates the admission is not an outlier. The field will be blank if the DRG is not found or if all the MarketScan benchmark amounts for the DRG are 0.
Length_Of_Stay_Comparison	YES	INT64	Identifies how admissions compare to the MarketScan average based on Length of Stay (LOS) for the DRG, that is, whether the admission was significantly longer or shorter than average for admissions in that DRG. Values: -3, -2, -1, 0, 1, 2, 3, where -3 indicates extreme outliers below the average, 3 indicates extreme outliers above the average, and 0 indicates the admission is not an outlier. The field will be blank if the DRG is not found or if all the MarketScan benchmark amounts for the DRG are 0.
Per_Diem_Comparison	YES	INT64	Identifies how admissions compare to the MarketScan average based on Total Allowed Amount per day for the DRG, that is, whether the admission was significantly longer or shorter than average for admissions in that DRG. Values: -3, -2, -1, 0, 1, 2, 3, where -3 indicates extreme outliers below the average, 3 indicates extreme outliers above the average, and 0 indicates the admission is not an outlier. The field will be blank if the DRG is not found or if all the MarketScan benchmark amounts for the DRG are 0.
Standard_Provider_Type	YES	INT64	Standardized provider type associated with the admission.
Admit_Type_Code	YES	INT64	Type of admission. 1 (Surgical) 2 (Medical) 3 (Maternity/Newborn) 4 (Psychiatric/Substance Abuse) 5 (~Missing/Unknown)
Standard_Facility_ID	YES	STRING	Facility ID Standard value from the first room and board claim in the admission.
Episode_ID	YES	STRING	Identifier for the episode of care associated with the admission.
Type	YES	STRING	Type of record or admission.
Tenant	YES	STRING	Tenant or organization associated with the admission.
Active_Version	YES	BOOL	Active version or status of the admission record (always Active).
Date	YES	DATE	Date of the admission or record creation/modification.
Sequence	YES	INT64	Sequence number or order of the admission record.

Column Name	Is Nullable	Data Type	Description
Source_System_Name	YES	STRING	Name of the source system from which the admission data originates (always named "Data Enrichment")
Source_Timestamp	YES	TIMESTAMP	Timestamp indicating when the admission data was sourced.
Source_File_Name	YES	STRING	Name of the source file containing the admission data.
Schema_Version	YES	FLOAT64	Version of the schema or data structure used for the admission data.
Admit_Source_Description	YES	STRING	Description of the admission source.
Admit_Source_Category	YES	STRING	Admission source: NEWBORN vs NON-NEWBORN.
Diagnosis_Related_Group_Description	YES	STRING	Description of the diagnosis-related group associated with the admission.
Calculated_Diagnosis_Related_Group_Description	YES	STRING	Description of the calculated diagnosis-related group associated with the admission.
Admit_Type_Description	YES	STRING	Description of the admission type.
Patient_Status_Code	YES	STRING	UB-92 patient status code. Also known as discharge disposition code.
Patient_Status_Description	YES	STRING	Description of the status of the patient associated with the admission.
Primary_Disease_Category_Description	YES	STRING	Description of the primary disease category associated with the admission.
Visibility_Level	YES	INT64	Level of visibility or access permissions for the admission record.
Behavioral_Health_Admission_Indicator	YES	BOOL	Indicator specifying if the admission is related to behavioral health.
Member_Partition	YES	INT64	Partition or segment of members associated with the admission.
_updated	YES	STRING	Timestamp indicating when the admission record was last updated.
