

# Kessi Newman

Photographer

Hello, My name is Kessi Newman and for my future I want to be a photographer. A couple of interests that I have would be that I love to sing, paint, take photos, sketch, and even design projects. Especially when it comes to sketching drafts of a design. My main focus when it comes to photography is to give my clients the style and look of what they are expecting from their sessions with me. This gives the client a chance to choose which aesthetic fits the ideal image they had in their mind. Without any clients, we all would never succeed after all.

# Zevia Photography

For this project, I had to pretend as if I was a photographer for the brand Zevia. The ideal image was to try to keep their vibrant aesthetic while showing their products. It was quite a fun experience to witness. With this project I learned how to create the photos to fit the sizings of each social media. Specifically trying to make horizontal photos still show in the posts but having it cut off a section of each photo without ruining the whole image.

# Senior Photos

For this session, I was asked to take senior photos for this lovely lady. Now I will say that with the techniques I have today, I could of done so much better with styling and editing however it still turned out quite good. Her aesthetic for the photos was to have a slight darker side to each of the images. Not too dark but not too light. This was quite difficult for me because the area where she chose had a bunch of bright backgrounds. She also asked for a slight grungy feeling to it all which was quite difficult to present.

# Couple Photos

For this session, one of my friends reached out to me to do a couple photoshoot for her. She chose this hiking spot that had a beautiful river in the area. For the photography, I wanted to capture actual connection between the two of them. In order to do this I had to attempt to convince them to pretend I wasn't there and act their true selves out in the actually photos. I really enjoyed the outcome and got to express their goofy sides in the photos.
