

Community Life Engagement Fidelity Scale[©]

January 2023

This fidelity scale is designed to help providers of day services for individuals with intellectual and developmental disabilities (IDD) determine their strengths and areas for improvement in supporting individuals' community life engagement. Community life engagement refers to access and participation in the community through inclusive non-work activities such as volunteer work, continuing education, and recreation. For more on CLE and the research behind this scale see: <https://cletoolkit.communityinclusion.org/>

This fidelity scale should be completed by staff and management who have a familiarity with the day services and supports offered by the provider.

Please respond to the following statements based upon how your [non-work] day services and supports are currently structured.

For each section, add up the numbers you circled for each response to see where you fall in the range.
